

Hair Strobing with Matrix

Isn't it so much fun to change your hair every once in a while? I think so! It's a great way to boost your confidence and refresh your look. Since Summer is less than a month away I was dying for a new look. I knew **Matrix** would give me the right golden, rich and fun color to go with my dark brown hair. Their products are long lasting and work great with different textures of hair.

I've had dark brown or black hair for years now and wear black almost everyday, but I knew I had to change it up this Summer with **Matrix**. I worked closely with my **Matrix** stylist, **Danielle Keasling** who came up with a color and look that would revamp my style! After a full day of strobing, styling and cutting my hair with a team of talented hair gurus from Matrix we came up with this amazing look! We had so much fun working together alongside the #Suarezsisters – Natalie and Dylana! The girls and I couldn't be happier with our new look. The Matrix team and I shot a little video of our time together and have lots of fun pics to share with you guys. I love the way the hints of color brighten up my eyes and make me look youthful and refreshed.

If you haven't heard of strobing before, it's a new technique that contours your face with hair color- It's similar in principle to what strobing is for makeup, where light is added to certain parts of your face to make features stand out! It's the next step up from ombre or balayage, and gives your hair that natural-looking, sun-kissed glow.

Do you think you'll try strobing your hair? Change your hair up this Summer with this simple look! Get the look with **Matrix Rock 'N' Strobe!**
